

# SENTRIFUGO HRMS

# EXTENDED PROFILE

## OVERVIEW

Sentrifugo HRMS is a human resources management platform, available as open-source free software. Built using modular a framework, the HR software can be developed and extended to adapt to the individual business's needs.

An overview of HR software features can be viewed on the Sentrifugo HRMS central dashboard, this page offers overall information at a glance. HR modules can be downloaded as and when they are required, meaning that companies can expand their HR functionality when it suits them, rather than having to invest time and money upfront for features that are not immediately required.

The Sentrifugo HRMS modules range from performance appraisal to analytics through to talent acquisition management and interview scheduling. There is also functionality to deal with disciplinary and performance appraisal. The nature of the software download is that an HRMS platform can be built to fit the needs of each business.

Sentrifugo HRMS is provided by the web development group Sapplica. Their website offers a support center, where businesses can request help with the software, and a users' forum to help find solutions to common problems and concerns.
